

Community and Societal Pediatrics' Rotation Evaluation Competencies

Patient Care

- Demonstrates an understanding of the resources available in the community to assist clinicians in the care of their patients and patient' families.

Medical Knowledge

- Identifies the epidemiology of the major causes of morbidity and mortality in infants, children and adolescents in our local community, nationally and internationally.

Practice-based Learning and Improvement

- Identifies approaches to integrating identification and mitigation of social and environmental determinants of health into practice.
- Discusses barriers to health and health care and actions pediatricians can take to respond to these barriers.

Interpersonal and Communication Skills

- Communicates with legislators/policy makers, child advocates and/or administrators about issues impacting children's health and well-being.

Professionalism

- Identifies ways s/he will translate the knowledge accrued on the CS-P rotation into practice, including identifying the responsibilities of pediatricians to respond to the social and environmental determinants of health.

Systems-based practice

- Defines the responsibilities, roles and ways pediatricians can advocate for children.
- Describes relevance and integration of the principles of child rights, social justice health equity into pediatric practice.
