- Self Certification Questions

Please answer the following questions about your QI project.

Will the project involve testing an experimental drug, device (including medical software or assays), or biologic? Yes/**No**

Is this a multi-site project (e.g. there is a coordinating or lead center, more than one site participating, and/or a study-wide protocol)? Please note that for IRB purposes all UF Health Gainesville and UF Health Jacksonville sites are considered as one location/institution so would not be considered a multi-site project. Yes/**No**

Has the project received funding (e.g. federal, industry) to be conducted as a human subjects research study? Yes/**No**

Is this a systematic investigation designed with the intent to contribute to generalizable knowledge (e.g. testing a hypothesis; randomization of subjects; comparison of case vs. control; observational research; comparative effectiveness research; or comparable criteria in alternative research paradigms)? Yes/**No**

Is the project intended to improve or evaluate the practice or process within a particular institution or a specific program? **Yes/No**

Will the project occur regardless of whether individuals conducting it may benefit professionally from it? **Yes/No**
